

## Hiring Mine Surveyors

The Hemlo Mine (“Hemlo”) is a long-life, fully integrated gold mining operation located approximately 35 km east of the town of Marathon in Northwestern Ontario, Canada. With more than a decade of reserves and significant exploration upside along the proven Hemlo greenstone belt, the organization is positioned to unlock the next chapter of growth at one of Canada’s premier gold districts.

### Your new role

- Conduct pre-drilling, drilling, and loading QA/QC activities to ensure compliance with mine plans and standards.
- Complete borehole surveys, hole pickups, and field verification activities.
- Monitor underground drilling and blasting activities and provide real-time feedback to operations and contractor crews.
- Conduct fragmentation analysis and assist with identifying opportunities to improve blasting performance and reduce oversize.
- Perform vibration monitoring and analyze blasting performance data.
- Assist with explosive quality control activities including density testing and loading verification.
- Track drilling and blasting performance metrics and maintain QA/QC databases and reporting systems.
- Work collaboratively with Engineering and Operations teams to identify and implement continuous improvement initiatives.
- Assist with testing and implementation of new blasting products, technologies, and procedures.
- Conduct underground inspections and field reviews to support safe and efficient operations.
- Support compliance with company safety standards, procedures, and applicable legislation.
- Assist with special projects and operational improvement initiatives as required.

### What you'll need to succeed

- Post-secondary education in Mining Engineering, Mine Technology, Surveying, or a related field.
- Previous underground mining experience required.
- Experience with underground drilling and blasting activities considered a strong asset.
- Operational underground mining experience considered an asset.
- Experience with Deswik, AutoCAD, or other mine planning and CAD-based software considered an asset.
- Physically capable of performing underground fieldwork, including walking steep grades and lifting up to 50 lbs.
- Valid Class G driver’s license required.
- Blasting certification or willingness to obtain certification considered an asset.

### What you'll get in return

- Opportunity to earn up to 12.5% STI bonus on top of the salary ranging \$75,000-\$115,000 (depending on experience)
- Relocation & housing assistance available for all roles
- Flexible rotation options (7x7, 14x14) to support strong work-life integration
- FIFO/DIDO from anywhere! Thunder Bay airport provides ease and convenience with the connection to most national flights.
- Shuttles provided to & from the airport/camp/site
- Full camp accommodations for both FIFO and DIDO workers (featuring private en-suite bathrooms)
- 100% employer-paid benefits including health, dental, vision, and paramedical coverage
- Educational assistance for Hemlo employees & scholarships for the dependents of Hemlo employees
- Above-market wages and salaries, with bonus programs and pension contributions for all roles
- Clear opportunities for career progression and internal mobility
- Direct access to senior leadership and on-site mentorship
