

Hiring Ventilation Technicians

The Hemlo Mine ("Hemlo") is a long-life, fully integrated gold mining operation located approximately 35 km east of the town of Marathon in Northwestern Ontario, Canada. With more than a decade of reserves and significant exploration upside along the proven Hemlo greenstone belt, the organization is positioned to unlock the next chapter of growth at one of Canada's premier gold districts.

Your new role

The Underground Ventilation Technician is responsible for ensuring effective airflow and environmental conditions throughout the underground mine. Working primarily underground on a daily basis, this position conducts routine ventilation surveys, monitors air quality, and supports the ongoing management and maintenance of the site's ventilation systems. The incumbent will compile weekly ventilation reports, identify deficiencies, and collaborate with the Mine Operations and Technical Services teams to ensure compliance with regulatory and company standards for a safe working environment.

What you'll need to succeed

- Mining Engineering Technician Diploma, Mine Engineering Degree, or equivalent experience preferred.
- Minimum of 1–3 years' experience in an underground mining environment, preferably in ventilation or technical services.
- Knowledge of underground ventilation systems, airflow measurement, and gas detection equipment.
- Familiarity with Deswik and Ventsim, or other ventilation modeling software considered an asset.
- Strong understanding of underground mining operations and environmental controls.
- Ability to work independently underground with minimal supervision.
- Physically capable of working in varied underground conditions, walking significant grades, and lifting up to 50 lbs.
- Proficient in Microsoft Office Suite (Word, Excel) for data entry and report generation.
- Strong written and verbal communication skills, with the ability to prepare clear and concise reports.
- Detail-oriented, safety-focused, and highly organized
- Valid Class G driver's licence required; ability to operate a manual vehicle considered an asset.

What you'll get in return

- Opportunity to earn 12.5% STI bonus on top of the salary ranging \$85,000-\$115,000 (depending on experience)
- Relocation & housing assistance available for all roles
- Flexible rotation options (7x7, 14x14) to support strong work-life integration
- FIFO/DIDO from anywhere! Thunder Bay airport provides ease and convenience with the connection to most national flights.
- Shuttles provided to & from the airport/camp/site
- Full camp accommodations for both FIFO and DIDO workers (featuring private en-suite bathrooms)
- 100% employer-paid benefits including health, dental, vision, and paramedical coverage
- Educational assistance for Hemlo employees & scholarships for the dependents of Hemlo employees
- Above-market wages and salaries, with bonus programs and pension contributions for all roles
- Clear opportunities for career progression and internal mobility
- Direct access to senior leadership and on-site mentorship
